Karen Johlas-Szalkowski, Environmental Educator

Email kjszalkowski@leecounty.org

Winter programs run November 15-March 15 of each year. Please limit winter programs to three per classroom to give each school a chance for programs. If there is topic you have in mind, but it is not on the list, just let us know and we can design a program to fit your needs. These programs can be scheduled at any time by calling our office; we fill up quickly, so call early!!

Third Grade

Food Chains

Students will learn what a food chains is and their interrelationship to nature. Learning will be demonstrated by playing a forest food chain game and listening to the story *Pass the Energy Please*.

Phases of the Moon

Students will learn about the phases of the moon through a story, lighted moon, and participate in a moon survival scenario.

Clouds, Clouds, Clouds

The students will learn about the different types of clouds, play a game related to clouds and weather, and make cloud books.

Insect Metamorphosis

Students will learn about insects in general and the insect life cycle. They will play an insect metamorphosis card game, where they need to collect each stage of the insect's life cycle to win the game.

Paper Recycling

Students will learn about paper recycling. They will see recycled paper and get a chance to make their own recycled paper. **Please note this lesson takes 1 hour.**

Vertebrate Grab Game

Students will learn the differences between birds, amphibians, fish, reptiles, and mammals. They will play a fun game with the knowledge they have just learned.

(Revised 2010)
